LOCAL ITEMS OF INTEREST

Fox's candy store. Thirty pure sugar sticks in a box, 10 cents.

Born to Mr. and Mrs. William G. Morris of the El Paso hotel, yesterday morning, a son.

J. E. Gould returned last night from Denver where he spent the last two weeks on business.

The council will meet tonight. Assistant from the report of the special water committee only routine business is expected.

State Supervisor Emma Shivel, of the Royal Neighbors, arrived last night from Colorado Springs and will be the guest of Mrs. F. O. Losay while in the city.

Miss F. D. Andrews, of 628 North Sixth street, left last night for Wichita, Kan., having been called there on account of the illness of her sister, Mrs. E. W. Spangler.

The first de-lux train will arrive here at 7:30 a. m. Thursday. The train will be exquisitely. Whether the eastbound service will begin the following week has not yet been learned here.

W. H. Andrews returned last night from Carlsbad where he went immediately after his return from Washington and Pittsburgh, and where he visited all the holdings of the Carlsbad Oil & Gas company.

Albuquerque Encampment No. 1, J. O. O. F. will meet in regular session tonight at 7:30 o'clock in A. O. U. W. hall. There will be installation of officers and other important business. All members are urged to be present. Visitors welcome.

A. E. Koehler, Jr., commissioner of public safety for the New Mexico board of managers of the Panama-California exposition, left last night for Secours and Don and counties to appear before the boards of county commissioners in the interest of the board of managers.

Miss D. E. Wickham of Company L, New Mexico national guard, announced yesterday that the company would drill twice weekly hereafter. Heretofore the company has drilled only once a week. The drill nights will be Monday and Thursday. The new order will be effective tonight.

CRUSHED BETWEEN LOCOMOTIVE AND ROUNDHOUSE WALL

Frank Fernando, 49 years old, narrowly escaped being killed at the Santa Fe roundhouse shortly after 1 o'clock yesterday morning when he was caught between a moving engine and the roundhouse wall. As it was, his right clavicle was splintered and he was severely bruised about the shoulders.

Fernando was hurried to the Coast Lines hospital in an ambulance and Drs. J. E. Elder and W. R. Lovelace, Santa Fe surgeons, attended to him. He was unconscious when put from between the engine and wall, but regained consciousness shortly before the ambulance reached the hospital. He was reported to be resting easily yesterday and it was not thought likely that he had suffered any internal injuries.

The man was walking along the running board of the locomotive with a basket of sand to set in the sand box of the boiler. The engine was moving slowly. He slipped and fell to the ground. His shoulders were on the left of the running board and he was rolled along for several feet between this and the wall.

"As Ye Sow," last time today at the Crystal.

BIG FAMILY HAS ONE BLANKET TO KEEP ALL WARM

Railway Officer Following Boy
Who Takes Tie From Yards
Finds Mother and Seven
Children Suffering.

Following a boy who was dragging part of a rotted tie from the Santa Fe railway yards, Station Master J. E. Sinclair late yesterday afternoon stumbled upon a pitiable case of suffering from cold, sickness and plain want of proper food.

Sinclair followed the boy to 620 John street and there saw a sight that caused him to abandon at once his intention of arresting the lad and not only allow him to go un molested for taking the tie, but called workmen and had them carry more wood to the home.

The boy, 14 years old, was the eldest of seven children. The other six, with their mother, Mrs. Louis Minehart, who is sick, were all trying to had cover under a thin blanket. They didn't have a bed. They were lying on the floor in the corner of one of their two rooms. A little black dog was lying on top of the blanket with his paws turned under his body, trying to keep warm.

Hallroad Men Bring Relief.

Men from the yardmaster's office, the yards, the station and Wells Fargo & Co. office relieved the condition of the family temporarily, but more is needed. Blankets and bed covers were obtained from several places and a large basket of provisions was obtained at the Alvarado hotel. The family ate heartily until everyone from the baby to the mother was satisfied. They had plenty of bed clothes to keep warm and a fire in their small stove.

When the men returned later with more stuff five dark little headstucks from under the bed on the floor. The boy was given a relative was taking care of another child. The second oldest, a girl of 12 years, worked at the Harvey house whenever she could get work.

No Shoes to Go to Doctor.

Mrs. Maria Gabaldon, who lives next door, said the Mineharts had only a cupful of beans and some results of yesterday. That was before their condition was discovered. The Mineharts family had no money for clothes and shoes. Well clothed, Mrs. Minehart and the two older children will be able to work. That is when she recovers. She is suffering from a severe cold that has caused some pulmonary affection that may develop into a serious disease if she is not properly cared for. Mrs. Gabaldon told the men that her neighbor had been unable to go to the city physician because she had no shoes to wear.

Mrs. Minehart has been married twice. All the children were born before her first husband died. She was married less than a year ago to the second, who promised to take care of her and all the progeny of the first, she said. However, he could not get along here at the beginning of the weather and was forced to leave, hoping to find steady employment elsewhere and to bring her to him. She heard from him from time to time and occasionally received some money from him, but a month ago the letters stopped. She does not know where her husband is and can only guess at what might have been the cause of the sudden interruption of his correspondence.

Neighbor Has Big Family.

The neighbor also has a numerous family, having six children, and her husband has gone away in search of work. She only asks, however, for help for her two oldest boys, one 18 years old and the other 14. She was somewhat better prepared for the winter than her less fortunate neighbor and she has assisted the Mineharts from time to time as much as her own resources would permit.

The Mineharts family evidently was overlooked by the municipal Santa Fe. Possibly they may have been given some provisions but so far they have all disappeared before seven health appetites whetted by abundance. Whether Santa visited them or not, they are in dire need now, not only of food, but also of clothes and more bed clothes.

**CHANGES ARE MADE IN
LEGAL DEPARTMENT OF
SANTA FE RAILWAY CO.**

Robert Dunlap, general attorney of the Santa Fe railway, with headquarters in Chicago, has been appointed special solicitor of the road. T. E. McMillan, general attorney at Oklahoma City, has been made assistant attorney general solicitor. These appointments were announced by Gardner Lachapelle, general solicitor.

Mr. Dunlap will have special charge of corporate and contract matters and of litigation outside of the states through which the lines of the system run. Mr. Bledsoe, in addition to his regular duties, will have special charge of valuation and tax matters, supervision of proceedings before state commissions and of litigation respecting their rules and from federal courts.

Shows Development.

The interior of the main portion of the building is modeled after the style of the ancient churches but the rear remittance stops. We have fitted it up in modern style, we have installed modern motion picture projection apparatus and competent operators and we are going to use it to show the world the progress that New Mexico has made in the last three centuries. Incidentally, we will give something more than a glimpse through pictures of the cliff dwellings and the Indian communities of a civilization which antedated that of the white man.

"I expect this to fully accord with the object of the Panama-California exposition, that is, to show the development of civilization on the American continent."

THREE CENTURIES REPRESENTED IN STATE'S BUILDING

Outside of Structure at San
Diego Portrays Earliest
Spanish Mission Architecture;
Inside Modern.

"There are three centuries between the outside and the inside of the New Mexico building," writes Ralph E. Twitchell, president of the New Mexico state board of exposition management.

Colonel Twitchell explained in detail the reasons which led to the selection of so striking a model for the state building as the New Mexico structure evidently had and asserted that it was patterned after Spanish mission churches a century older than anything in California.

"While our building itself is typed after the ancient Spanish mission churches of Acosta and Cochiti," Colonel Twitchell continued, "inside we are employing the latest thing in science to educate the public regarding the history, resources and opportunities of our state. We have captured the whole state and brought it here in motion pictures.

Unique Picture House.

"These pictures, shown in the building, are a marked contrast to the quaint and dignified exterior. We think we have the most unique motion picture theater in the world. New Mexico is the first state to take up the motion picture as an educational and publicity medium. The idea of the motion picture as a publicity medium has been developed by many other institutions and we take considerable credit for our work in this connection.

"We have secured pictures in the past year which are absolutely priceless. Some of them are of the highest value from an ethnological standpoint, for they show in all their detail, the ceremonial dances of the Pueblo Indians and the fire dance of the Navajo. These films, I am told, would be worth an unaided sum to a producing motion picture company, but they were secured by the board by express permission of the Indian councils on condition that they should never be exhibited commercially.

"Consequently, except when they shall be brought from the state museum-archives for educational use, they will never be seen anywhere but here in the state capital. This board has been compelled to decline a very handsome offer, indeed, for the single reel of the fire dance pictures, for we must keep our pledge to the Indians.

Mining Industry Shown.

"And then we have the mining industry, foremost producer of revenue in the state of New Mexico, shown in several reels of film and hundreds of slides. The films show copper and coal mining in great detail, those being the more important phases of New Mexico mineral activities, and gold and silver and lead mining in slightly lesser detail.

"We have the livestock industry, second in importance of the state's activities, shown in detail from the start to the slaughter of the finished stock. We have agricultural series showing alfalfa, trills, all the varied crops of the state in all phases of production. We have films showing the irrigation enterprises. Our dams and pumping plants in fact we have everything of interest to a prospective investor in the state captured in film and slides and told about in lectures.

"Especially important are the educational films and slides. We have one three-reel picture which shows the education of a teacher at our normal university. This picture displays graphically all the events of the girl's life from the time she decides to enter school for a normal education until her graduation and follows that with her actual experiences in the class rooms. We also have films of the state deaf and dumb and blind schools, showing how these unfortunate children are educated to make a living for themselves and to become useful members of society despite their handicaps.

Editorial Sterling Events.

"And all this we are housing inside a building which is to all intents and purposes a replica of two structures more than 200 years old. The main characteristics of our building are drawn from the church of Acosta, a huge structure erected on top of a mesa 220 feet high by the Indians after the direction of Franciscan fathers soon after the entrance of the Standard into the southwest. This church is intimately connected by association with many of the most stirring events of the early days in New Mexico, perhaps the most interesting of which is the revolution by which the Pueblo Indians under Juan Ponce obtained control of the government of the region, a control they retained for 16 years.

The trip will be made in automobiles, the party going north stopping first at San Marcial, then Socorro and then Abiquiu. From Abiquiu the party will go to Santa Fe, and then into Taos and Rio Arriba counties, the trip closing with meetings in San Miguel, Mora and Colfax counties. Arrangements will be made with the various commercial clubs along the route for public meetings which will be thoroughly advertised, and it is expected that large crowds of English and Spanish, and everybody else will be drawn to the college work to the farmer's door.
